SUBJECT: **STATUS OF WEST NILE VIRUS PRESENTATIONS**

On July 20, 2004, the Board approved a motion by Supervisor Antonovich, instructing the Department of Health Services to offer the services of the Speakers Bureau for making presentations regarding the West Nile Virus (WNV) to City Councils, Town Councils and other community organizations in the cities; and communicate with the Mayors and City Managers of the cities letting them know of the status of the WNV in the County and how available resources can be accessed by their residents.

Attached you will find a distribution list and a sample of letter which was mailed to all city mayors in Los Angeles County. This letter informed officials and provided how to access the Los Angeles County Department of Health Services Speakers Bureau, list of DHS services available to residents regarding WNV in the County, an updated WNV activity summary of all human and equine cases to date, resource phone numbers, and a mosquito abatement district services map for their review.

If you have any question or need additional information, please let me know.

Honorable Dan Kuperberg  
Mayor, City of Agoura Hills  
30001 Ladyface Court  
Agoura Hills, CA 91301

Dear Honorable Dan Kuperberg:

**SUBJECT: WEST NILE VIRUS ACTIVITY IN LOS ANGELES COUNTY IN 2004**

The Board of Supervisors requested that I communicate with you to fully inform you and officials in other cities in Los Angeles County (LAC) about West Nile Virus (WNV) programs and activities underway and how available resources can be accessed by your residents.

**THE DISEASE:**

Most people who are infected with WNV are asymptomatic – only one in every five persons infected with WNV will experience symptoms. However, of those who become ill, symptoms can include fever, headache, nausea, body aches, mild skin rash, or swollen lymph nodes. WNV may affect the central nervous system; in a few cases, the disease will progress to meningitis or encephalitis (inflammation of the brain).

WNV is spread by the bite of an infected mosquito. Mosquitoes are WNV vectors that become infected when they feed on infected birds. These infected mosquitoes can then spread WNV to humans and other animals when they bite. Specific control measures focus on controlling the mosquito vector and educating individuals on safeguards to reduce the risk of mosquito bites.

**WEST NILE VIRUS ACTIVITY IN LOS ANGELES COUNTY IN 2004:**

West Nile Virus case totals change on a daily basis. A copy of the most recent report is attached. For updated case counts, visit our website at <http://lapublichealth.org/acd/VectorWestNile.htm>.

**PREVENTION AND SURVEILLANCE:**

Prevention activities to limit the community impact of WNV require a multidisciplinary team approach. Los Angeles County has worked with the independent Mosquito and Vector Control Abatement Districts, the other local public health departments of Pasadena, Vernon, and Long Beach, and other interested public health organizations on this effort. Much of the effort for

mosquito abatement is the responsibility of the five vector control districts operating in LAC. This year, the County has funded mosquito abatement activities in cities and unincorporated areas that are uncovered or without routine mosquito control services. DHS staff is working with these cities and mosquito control districts toward a permanent solution including the possibility of annexation of uncovered areas into an existing district.

West Nile virus surveillance in Los Angeles County includes the reporting of human and animal cases of this disease. To enhance timely human disease identification and enacting localized prevention efforts to limit additional cases, laboratory documented West Nile Virus (WNV) infection has been added to the list of mandated reportable diseases and conditions in Los Angeles County (California Code of Regulations, Title 17, Sections 2503 and 2505). Physicians and laboratories must report patients with a positive WNV test to DHS within one (1) working day using a standard Confidential Morbidity Report (CMR).

#### **EDUCATIONAL EFFORTS:**

In anticipation of human WNV cases, DHS recently mailed out over 34,000 WNV information CD-ROMs to healthcare professionals throughout Los Angeles County. Department staff has conducted training on West Nile virus for various agencies including County Parks and Recreation, Agricultural Commissioners/Weights and Measures, Public Works, the United States Forest Service, and the Los Angeles City Department of Recreation and Parks. We have trained over 100 DHS staff in a comprehensive WNV presentation curriculum. These staff are available to make presentations to your City Council, to your staff, or to community agencies in your city. Presentations may be arranged through the Area Health Officer serving your area (see attached list).

For public use, DHS established a toll free telephone number with information in five languages (1-800-975-4448). A website (<http://lapublichealth.org/acd/VectorWestNile.htm>) is maintained with updated WNV information, resources, and downloadable materials such as: a one page low literacy flyer in English and Spanish; a 16-page Mosquito Control booklet in English and Spanish; periodic WNV Activity Summaries which reflect current statistics; and links to various other resources, such as the Mosquito and Vector Control Abatement Districts and the Centers for Disease Control and Prevention (CDC).

#### **CONCLUSION:**

With the identification of human cases and strong environmental indicators indicating the presence of WNV, we are certain to have more human cases. Accordingly, surveillance, containment, and public education activities continue to be a public health priority to meet the increased public health need.

Very truly yours,

Thomas L. Garthwaite, M.D.  
Director and Chief Medical Officer

## WEST NILE VIRUS ACTIVITY SUMMARY #11 (August 6, 2004)

### Los Angeles County case total now 24.

As of 8/6/04, 24 cases of West Nile disease have been identified in our county—2 cases were asymptomatic blood donors, but most (n=14, 58%) were diagnosed with neuroinvasive disease (6 with encephalitis, 7 with meningitis, and 1 with acute flaccid paralysis). Among all of the cases, most are males (n=22, 92%) and the majority are residents of eastern cities (n=18, 75%). The age range for all of the cases is 9 to 71 years—cases diagnosed with neuroinvasive disease tend to be older (median age 59 years) as compared to those with West Nile fever (median age 43 years).

### POSITIVE WNV TESTS, YEAR-TO-DATE, 2004\*

	Human Cases	Equine Cases	Environmental Surveillance		
			Dead Birds	Sentinel Chickens	Mosquito Pools
Los Angeles County	24**	1	648***	15	71
California	103	62	1,250	127	341

\* As of 8/6/04—data are provisional and subject to change.

\*\* Excludes cases in Long Beach and Pasadena.

\*\*\*As noted below, bird collection has been discontinued in many Los Angeles areas; as such, this frequency underestimates the number of WNV-infected dead birds occurring in our county.

#### West Nile virus-infected dead birds:

WNV-infected dead birds have been recovered from nearly all areas of Los Angeles County. Statewide, more than half of the WNV-infected dead birds have been recovered from our county, and most of those from eastern cities.

**For questions regarding the reporting and testing of West Nile virus, visit:**

Los Angeles County, 8/3/2004**

# WEST NILE VIRUS

## Resources Available

COUNTY OF LOS ANGELES  
DEPARTMENT OF HEALTH SERVICES  
**Public Health**

### West Nile Virus, General Information

1. LA DHS phone line at 1-800-975-4448  
(Available in English, Spanish, Chinese, Korean, and Vietnamese)
2. West Nile Virus web page at [www.LAPublicHealth.org](http://www.LAPublicHealth.org)
  - Health Education Materials, that can be downloaded
  - Information for healthcare providers

### Dead Bird Reporting

Dead birds in certain locations of LA County are no longer being picked up, however continue to report dead birds:

1. LA County Public Health Veterinary  
1-877-747-2243
2. California State Health Department  
1-877-WNV-BIRD

### Healthcare Professionals

1. Physicians must report all cases of West Nile Virus disease to ACDC at 213-240-7941.
2. Reporting Forms and Lab requirements can be down loaded online at the West Nile Virus web page through [www.LAPublicHealth.Org](http://www.LAPublicHealth.Org)

### Mosquito and Vector Control Abatement Districts (MVCD)

There are five MVCDs and they each handle the following:

- Reports mosquito or standing water issues
- Have the ability to cite and fine
- To obtain mosquito fish or other abatement, dead bird testing, or education materials.

The five districts are:

1. Greater LA County VCD  
562-944-9656 or [www.glacvcd.org](http://www.glacvcd.org)
2. San Gabriel Valley Mosquito and VCD  
626-814-9466 or [www.sgvmosquito.org](http://www.sgvmosquito.org)
3. LA County West VCD  
310-915-7370 or [www.lawestvector.org](http://www.lawestvector.org)
4. Compton Creek Mosquito Abatement District (MAD) 310-639-7375
5. Antelope Valley MVCD  
661-942-2917 or [www.avmosquito.org](http://www.avmosquito.org)

NOTE:

To determine which MVCD corresponds to your zip code, contact 1-877-WNV-BIRD.

For people living in Long Beach or Pasadena, please direct them to  
LONG BEACH: 562-570-4132 or [www.longbeach.gov/health](http://www.longbeach.gov/health)
